His latest album, “The Lunar Injection Kool Aid Eclipse Conspiracy,” was released in 2021. ABOUT FILTER

Diversity has been a hallmark of Richard Patrick’s career, and it’s administered with crushing efficiency on his latest eclectic set of new material from his band Filter.

Filter was originally formed in Cleveland, Ohio, in 1993 when Patrick desired to start his own band after leaving Nine Inch Nails as their touring guitarist. Their debut album, "Short Bus," was released in 1995 and ended up going Platinum, largely due to the success of the single "Hey Man Nice Shot." The follow-up, 1999's "Title of Record," also went Platinum, driven by the success of the song "Take a Picture."

Patrick, the lone constant member of the veteran industrial rock act, reunited with original Filter programmer and producer Brian Liesegang to write several songs on "For The Beaten," the band's first new album in five years.

Fans weaned on the industrial outbursts and corrosive beats of the band's Platinum albums will be ecstatic to hear Patrick's unmistakable scream and unflinching honesty dominating their new album. For more information, visit officialfilter.com.
